Professional Summary

Generalist TD with experience developing pipeline tools, artist-facing workflows, and rendering solutions for VFX and animation. Particularly interested in USD-based pipelines, AI workflows, and production-focused tool development.

Core Skills

VFX Tools: Houdini, Blender, Maya, Substance Painter, Nuke, ComfyUI, Qube, Karma, Arnold, Renderman
Programming: Python, C++, C#, Java, Rust, HTML, CSS, JavaScript, Kotlin
Pipeline / Platforms: Git, npm, Docker, Rez, Linux, Windows, USD, Qt, React, OpenGL, OpenEXR, AWS
Strengths: Pipeline Development, Tool Building, Communication, Problem Solving

Professional Experience

R&D Developer

Untold Studios

August 2026 – Present
London, United Kingdom

R&D Intern

Electric Theatre Collective

June 2025 – September 2025
London, United Kingdom

- Developed AI tools for motion capture and camera tracking to support artist workflows.
- Built a web app to streamline launching AWS instances for rendering.
- Integrated Blender in to the ETC pipeline, expanding tooling support within the studio workflow.

Featured Projects

REBELS

University Film

2026
[youtube/REBELS](https://youtube.com/REBELS)

- Designed and maintained a Houdini-USD centric pipeline for streamlined production.
- Delievered Assets, Rigs, FX, Lighting, and Compositing across shots in Blender, Houdini, and Nuke.

Deadshot

ACM Siggraph Eurographics Symposium on Computer Animation

2026
cjhosken.github.io/deadshot

- I presented Adaptive Velocity-Confidence Smoothing, a novel variation of the One Euro Filter and Confidence Weighted Filtering, primarily used to reduce noise in monocular-based pose estimation.

Education

BA, Computer Animation Technical Arts

Bournemouth University

2026
Bournemouth, United Kingdom

Relevant Coursework: Pipeline, Software Development, USD, AI, Houdini
